

Redline Hi-Hat Stand H2050

Pearl's H2050 Hi-Hat Stand delivers unparalleled versatility and customization in hi-hat pedal control.

Hosting many of the key characteristics of our world-class Eliminator: Redline bass drum pedals, H2050 is the only hi-hat stand that features Pearl's Patented Interchangeable Twin-Cam System. From the "Perfect Circle" linear action (Black Cam,) to Radical Progressive action (Red Cam,) its PosiLink drive function takes feel and function control to new heights.

Changing action and feel is as simple as pushing the cam release button and snapping another cam in place. Its included Redline Pedalboard features Pearl's exclusive reversible Traction Plate insert, allowing individual traction grip configuration to suit your exact playing requirements.

Finally, the H2050's collapsible solid frame pedal and Trident-stabilized dual strut support legs form a perfect tripod to accommodate multiple pedal set-ups. The

difference is clear: H2050 is advanced, fast, and personal gear for the technically-oriented drummer.
